

Think Memory Products®

Since 1987, ThinkCP™ has manufactured and supplied millions of memory products to thousands of satisfied customers throughout the world. Although representing only one of our many product lines, Think Memory Products® was our first product line when we opened our doors in 1987.

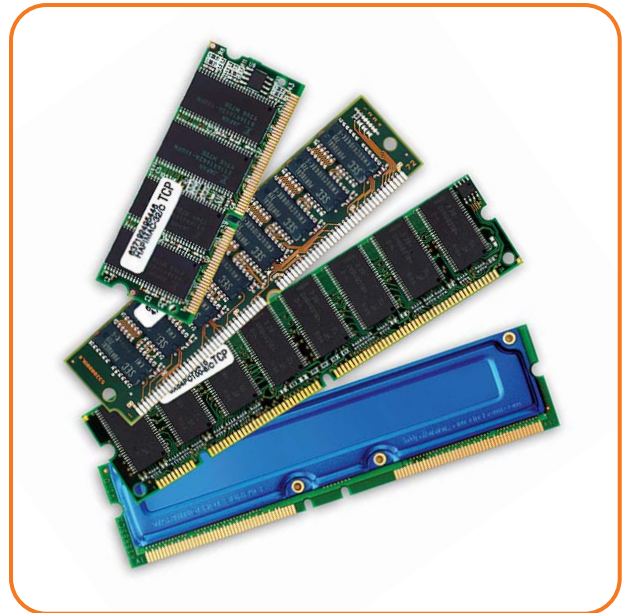

Throughout the years, ThinkCP has developed one of the broadest lines of memory components and upgrades available anywhere. Think Memory Products are produced for thousands of manufacturers of computing equipment and peripherals, including desktops, servers, workstations, servers, printers, notebooks, routers, handheld devices, digital cameras and other electronic peripherals. All Think Memory Products are covered under our Lifetime Warranty. We guarantee every component will perform as well as, or better than the OEM equivalent and will operate to the same form, fit & function as the original manufacturer's product.

Think Memory Products® are backed by memory sales experts and further supported by professional customer and technical support personnel with attention to detail. As part of our top-tier support services, ThinkCP provides one of the broadest online memory configurators in the market, containing thousands of memory options for all major manufacturers. The configurator allows you to easily find the memory you need, and request quotes on-line. At the request of our customers, we'll soon be adding full featured business-to-business e-commerce to our online configurator making procurement a snap.

When you or your customers are looking for memory, Think Memory Products stands out as the best choice for quality, selection, price and service.

- Lifetime Warranty
- Enormous Selection
- Expert Memory Support
- On-Line Configurator & E-Quotes
- Premium Quality

ThinkCP offers complete memory solutions for all your computing needs.
