

Corporate Fact Sheet

(ThinkCP™ Technologies is a fictitious business name of H. Co. Computer Products, a California Corporation.)

Business Overview

Founded in 1987 and headquartered in Irvine, California, H. Co. Computer Products, Inc. dba ThinkCP Technologies™ is an Intel Platinum Technology Provider, GSA Contract Holder and ISO 9001:2008 QMS accredited technology company that specializes in the custom design, integration and assembly of high-performance computing and storage solutions centered around the needs of enterprise class customers throughout the world. In developing solutions, ThinkCP teams directly with alliance partners such as AMD, Dell, HP, Intel, Lenovo, MF Digital, Microsoft, Novell (Suse Linux), Open-E, Qlogic, Red Hat, Super Micro, Texas Memory Systems, Transition Networks and others.

ThinkCP Technologies designs and provides customers Think Brand Solutions such as ThinkTankIQ™ Clusters, Blades, Servers and Workstations, Think ViPoR Storage Solutions and Think Security Products™. To complement their offering, the company provides thousands of commercial off-the-shelf brands of hardware and software products from the industry's leading manufacturers and developers.

Philosophy - "Success breeds Success."

ThinkCP™ Technologies was founded on the basis of symbiotic business relationships.

"When our customers succeed, we succeed."

"Our philosophy of success is one of the main reasons that customers choose to develop and maintain continual business relationships with ThinkCP Technologies."

Quality Policy & ISO 9001:2008

In May of 2000, ThinkCP(TM) Technologies was certified ISO 9001:2000 QMS compliant by BSI, Inc. (Now ISO 9001:2008). The ThinkCP(TM) Technologies ISO Quality Policy was developed in order to define the company's top down quality management approach to implementing, monitoring, reviewing and continually improving operational processes that directly affect customer satisfaction.

"It is the Quality Policy of ThinkCP Technologies to comply with the requirements of, and continually improve the effectiveness of the quality management system, by; Continuously maintaining a high degree of customer satisfaction; providing a variety of quality products, and; providing quality sales, customer and technical support in a timely manner."

Sales, Support & Service

1-on-1 Support

ThinkCP's one-on-one *personal-quality approach* to business relationships - in contrast to many of today's sterile, e-commerce based relationships - is one of the company's key-selling propositions. In addition to dedicated account managers, a sales team provides contingent support.

Experience & Flexibility

ThinkCP™ is still smaller than the typical first-tier, industry “goliaths”, allowing the company flexibility in their approach to customer requirements. The company maintains the experience, references and partnerships which supports a foundation of credibility and integrity.

Customer Support Designed for Small, Medium & Large Organizations

Since 1987, ThinkCP has supported the needs of commercial companies throughout the world. Although the company supports other market segments, their focus on commercial corporations and federal government yields the education, training and experience to help smoothly facilitate the acquisition process and post-acquisition support requirements.

Enterprise Computing - Improved Performance at Lower Total Costs

In supporting the customers' enterprise infrastructures, the company focuses on alternative approaches to conventional integrations that have proven to yield higher performance and lower total cost of ownership (TCO) than is typically found in “mainstream” industry solutions. When needed, ThinkCP collaborates with other organizations in developing “right-sized” service and support programs for some of the more complex enterprise environments. On-site installation, on-site service warranties, systems integration and custom engineered solutions complete the offering for the commercial, government and higher education markets.

ThinkCP™ Technologies Brand - Product Selection

ThinkCP(TM) Technologies Brands	Sub-Title/Sub-Category	Description	Market Focus
Think Computer Systems™	ThinkTankIQ™	High-performance computer servers, clusters, storage servers, blades and digital media workstations,	Horizontal & Vertical. Enterprise through medium business. Commercial, Government & Higher Education
	ThinkPower Systems™	Desktop PCs, client workstations & terminals.	Horizontal. Enterprise through small home business & retail consumers. Commercial, Govt., Higher Ed. & Home Users
Think Storage Products™	Enterprise Class	Storage clusters, SAN, NAS, RAID & JBOD Solutions. Hard Drive, Solid State, Tape & Optical based storage solutions.	Horizontal & Vertical. Enterprise through medium business. Commercial, Government & Higher Education
	Think Fire-n-Ice™	External, stand-alone hard drives with FireWire(400/800), USB, e-SATA and other interfaces.	Horizontal. All market segments, including retail consumers & enterprise.
Think Security Products™	Think FIDS Drives™	FIPS Encrypted Data Storage drives with FIPS 140-2 validated software module. Single or Dual Authentication (e.g., Password, RFID Token, USB Token, Fingerprint Biometrics). Mobile or Desktop, capacities up to 16TB or more.	U.S. Federal Government Agencies only.
	Think FIDA Drives (Fingerprint ID Authentication)	(NIST) AES Encryption. Multi-user compartmentalized security w/admin controls, biometric sensor, in USB2 flash drive token	Horizontal & Vertical. Enterprise through medium business. Commercial, Government & Higher Education
Think Memory Products®	Think Memory Modules	SDRAM, DIMMs, etc. Universal & Proprietary with lifetime warranty. For system builds & upgrades	Horizontal. All market segments, including retail consumers & enterprise.
	Think U-Key-Com™ (USB Flash Drives)	USB Flash drives. Includes standard USB flash "key" drives, secure token drives & custom designed/ engineered/or imprinted versions.	Horizontal. All market segments, including retail consumers & enterprise.
	Think Perfect Pix	Flash media cards for cameras, and other digital electronic devices requiring Compact Flash, Smart Media, MMC, SD/XD & other flash memory.	Horizontal. All market segments, including retail consumers & enterprise.
Think Networking Products®	SOHO Line (Small Office/Home Office)	Basic wired network gear.	All segments.
