

ThinkTank Q-Cluster™ Featuring AMD Opteron™ Processors To Preview At FOSE 2003

April 2003, Irvine - Think Computer Products will be participating in the AMD (Advanced Micro Devices) Boston Design Center Exhibit at FOSE 2003 in Washington D.C. April 8-10, 2003.

Think Computer Products will be featuring the latest ThinkTank IQ™ Systems based on AMD Opteron™ processor technologies.

Although not slated for release until April 22, the ThinkTank Q-Cluster™ Base DP64, utilizes Dual AMD Opteron™ processors for HyperTransport™ based, high performance clustering. The unit will utilize SuSE Linux 8.1 and Scyld Beowulf Cluster Operating software in

demonstrating some of the industry's best price/performance ratios. The base unit is packed tight and running cool in a specially designed rackmount enclosure.

The Q-Cluster™ will also demonstrate the power of Film Compositing & Video Effects running on SuSE Linux, with a StorCase InfoStation II scaleable RAID sub-system for massive production storage requirements.

Why choose Think Computer Products for your AMD Opteron™ solutions? In addition to our launch partner relationship with AMD, we team with the industry's leading prime contractors and specialty VARs in providing ISO 9002 quality, rapid fulfillment, custom-built, cost-effective solutions. Think Computer Products is well known among NASA, the Navy and other federal government agencies. We maintain a GSA Schedule for teaming with government resellers, and subcontract through numerous other contract vehicles.

FOSE 2003 will be held at the Washington D.C. Convention Center this year on April 8-10. Now in its 27th year, FOSE is widely attended by many government I.T. buyers, contractors and government professionals. For additional information on FOSE 2003, please visit <http://www.fose.com> If you do attend, please be sure to stop by the AMD booth and visit Think Computer Products.

How Many Legs Does An Optiroo™ Have?

None, of course. Think Computer Products recently released the Fire-n-Ice Optiroo™, our external, high performance DVD/CD RW. If you're into audio-video production or optical storage and want high speed transfer rates (FireWire, USB2 or combo FW/USB2 interface), checkout the Optiroo™ featuring the Pioneer Electronics DVR-A05 internal drive. Our readers are eligible for special promotional pricing during the months of March and April 2003 – just mention the newsletter to your sales representative. For tech. information and details on the Optiroo contact Think Computer Products or visit –

THINK READER PROMO!

Optiroo™ DVD/CDRW Special

\$389

- FireWire
- USB2
- or Combo FW/USB2

Mention our newsletter and be eligible to purchase the Fire-n-Ice Optiroo™ External DVD/CDRW System featuring the Pioneer A05 drive (MSRP \$459) for the special promotional price.

* Offer valid only during March and April 2003. Only one per customer at promotional pricing.

**Did You Know?
Think Sets Record for Linux
Based Server Sales in 2002**

Last year, Think Computer Products shipped over one million dollars in ThinkTank IQ^a Linux based server solutions. That set the record for annual sales of our Linux based solutions. When we first analyzed the numbers, it didn't seem to stand out as anything significant. Then we studied the figures as reported by many of the first and second tier computer manufacturers and discovered that we had captured a small, but notable portion of the market - perhaps even rivaling some of the industry's "status quo" players.

So what's the icing on the cake? Think Computer Products recently received a year award in excess of \$15 million in Linux servers and platform and may generate much as \$10 million in Linux Servers this year alone. And we're just getting started.

Think New Developments

Think Computer Products recently renewed their GSA Schedule 70 Contract GS-35F-4917H. The new contract period is January 22, 2003 through January 21, 2008. (Look for it under H.Co. Computer Products, Inc. dba Think Computer Products)

Think Computer Products recently added or is adding the following vendors on their GSA Contract;

| Recently Added | In Progress |
|----------------|---------------------------------|
| Adaptec | APC (American Power Conversion) |
| NEC/Mitsubishi | Inostor (Tandberg Data) |
| Sony | Iomega Corp. |
| Targus | TrippLite |
| Viewsonic | |

Think Fire-n-Ice DMK (Disk Mirroring Kit) is a fast, efficient way to add bigger hard drives to laptops while keeping your data and operating systems in tact. Take a look at <http://www.thinkcp.com/products/FirewireDMK.asp>

**More on Award Winning Fire-n-Ice
Announcing Fire-n-Ice 800
(FireWire 1394b) Disk Drives**

Irvine, April, 2003 - Today, Think Computer Products announced the Fire-n-Ice 800 FireWire 1394b Hard Drive, the latest addition to Think's award winning product line-up. The Fire-n-Ice 800, due for release next month, utilizes a FireWire 1394b interface to attain nearly twice the transfer bandwidth as conventional FireWire (1394a).

For those not familiar with the advantages of external FireWire and USB2.0 drives, here's a quick rundown:

- Plug & Play
- Huge Capacity Capacities up to 250Mb and growing
- Fast - Works about as fast and conveniently as an internal hard disk.
- Flexible - Great for additional storage, field/laptop to home/desktop portability, system-to-system file transfers/file sharing and backups.
- Expandable - Connect up to 63 computers and devices on a single bus with minimal latency

**High Speed Port
Upgrades for
"Clunkers"**

The latest high speed USB2, FireWire & FireWire 800 interface upgrades from Think Computer Products plug right into your PCMCIA or PCI slot giving you instant high speed compatibility with the latest in DVD Camcorders, cameras, scanners, media readers, portable computing devices and, of course, the award winning Fire-n-Ice hard drives & DVD/CD RWs from Think Computer Products.

| Part Number | Description |
|--------------|---|
| PCMCIA-USB2 | PCMCIA Adapter to USB2 |
| PCMCIA-FWA | PCMCIA Adapter to FireWire (IEEE1394) |
| PCMCIA-FWB | PCMCIA Adapter to FireWire800 (IEEE1394b) |
| TSPPCI-FWA | PCI to 3 port FireWire 1394a |
| TSPPCI-USB2 | PCI to USB2 |
| TSPPCI-FWAU2 | PCI to combo FireWire 1394a & USB2 |
| TSPPCI-FWB | PCI to FireWire800 (1394b) |
| TSPPCI-FWBU2 | PCI to Combo FireWire800 (1394b) & USB2 |
